Little (li t'l), *a., adv.*, and *sb.* Forms: 1 lýtel, lítel, *Northumb.* lyttil, (lýtl-, lítl-), 2–3 lutel, lut(t)l-, lit(t)l-, 3 lutal, luttel, leitel, 3–5 luytel, litelle, -ul, 3–6 lit(t)el, litell, 4 lutel, littal, lytalle, -ulle, 4–5 lytul, 4–6 lytel, -il, -yll, litil(l, littill, -ell, 4–7 litle, 5 litullie, -ille, -yll, littull, lytyle, -elle, 5–6 lyt(t)ell, lyttyll, lytill, -yl(le, 6 lyt(t)le, lyttil, lytel, litylI, (laytell, lickell, 7 lickle), 6– little. See also LEETLE [OE *lýtel, lytel*, corresponds to OS. *luttil* (MDu *luttel, lettel*, Du. *luttel*), OHG *luzzil*, also *luzzi*, ? *lūzzi* (MHG, mod G dial. *lutzel*) — WGer **lîttilo-*, f **lît* (prob. f. the root of OE *lútan* to bow down: see LOUT *v*) represented in OE *lýt, lyt* (and the equivalent forms see LITE *sb.*), and in OS *luttik*, OFris *littich*, OHG. *luzzîg* little A synonymous and phonetically similar (but radically unconnected) adj OTeut. **lîtilo-* is found as Goth *leitils*, ON *litell* (Sw. *liten, lilla*, Da. *liden, lille*), and possibly in OE. *lítel*, MDu. *lîtel*, mod Flem. *lyter*, the root **lît-* —pre-Teut. **leid-* may be cogn with **loid-* in Gr. λοίδορος abuse, L. *lūdus* (—**loudos*) play, some scholars have compared Lith. *laidau* I let flow, *leidžu* I set free.

The long vowel in OE *lýtel* is vouched for by metrical evidence (Sievers in *Beitrage* X 504) and certain features of the declension (Sarrazin *ibid* IX 365), as well as by the early ME *lutel*. On the other hand, the Northumb. *lyttel*, and the widespread early ME. *luttel, littel*, suggest that the *y* may have been short in some dialects, and perh generally in the syncopated flexional forms. The modern dialects that are marked by a large Scandinavian element in the vocabulary mostly have the vowel long, the pronunciation being (lītl) or the like, this seems to point to influence from the ON *litell*]

A. *adj.* The opposite of *great* or *much*. Compar. LESS, LESSER, superl. LEAST

These forms, however, are not quite coextensive in application with the positive, so that in certain uses the adj has no recognized mode of comparison. The difficulty is commonly evaded by resort to a synonym (as *smaller, smallest*); some writers have ventured to employ the unrecognized forms *littler, littlest*, which are otherwise confined to dialect or imitations of childish or illiterate speech

I Opposed to *great* Often synonymous with *small*.

Its customary antithetic association (in mod Eng.) is with *great* or *big*, not with *large*, on the other hand, *small* is the customary antithesis of *great* or *large*, but not of *big* One difference between the two synonyms is that *little* is capable of emotional implications, which *small* is not

Liver (lɪ·vəɹ), *sb*.3 Also 7 leaver, 7–9 lever [A back-formation from the name *Liverpool.*] A name arbitrarily given to the bird figured in the arms of the city of Liverpool.

It was intended for the eagle of St. John the Evangelist, the patron saint of the corporation, but owing to the unskilful delineation there have been many guesses as to the identity of the bird represented. In some ornithological books the name is given to the Glossy Ibis.

Napier does not explain his view of the literal meaning of *logarithmus*. It is commonly taken to mean 'ratio-number', and as thus interpreted it is not inappropriate, though its fitness is not obvious without explanation. Perhaps, however, Napier may have used λόγος merely in the sense of 'reckoning', 'calculation' (cf. Logistic).]

One of a particular class of arithmetical functions, invented by John Napier of Merchiston (died 1617), and tabulated for use as a means of abridging calculation. The essential property of a system of logarithms is that the sum of the logarithms of any two or more numbers is the logarithm of their product. Hence the use of a table of logarithms enables a computer to substitute addition and subtraction for the more laborious operations of multiplication and division, and likewise multiplication and division for involution and evolution.

The word is now understood to refer only to systems in which the logarithm of any number a^{x} is x, a being a constant which is called the *base* of the system. The logarithms (of sines) tabulated by Napier himself were not logarithms in this restricted sense, but were functions of what are now called the *Napierian* (also *Neperian*), *hyperbolic*, or *natural logarithms*, the base of which, denoted by the symbol e or e, is 2.71828+. This system is still in use for analytical investigations, but for common purposes the system used is that invented by Napier's friend Henry Briggs (died 1630), the base of which is 10, the *Briggsian* or *Briggian* logarithms are also known as *common* or *decimal logarithms*. For *binary*, *Gaussian logarithm*, see the adjs *Logistic logarithms* (see quot. 1795), also called *proportional logarithms*.

In mathematical notation 'the logarithm of' is expressed by the abbreviation 'log' prefixed to numeral figures or algebraical symbols. When necessary, the base of the system is indicated by adding an inferior figure. thus 'log$_{10}$ a' means 'the logarithm of a to the base 10'.

-loger (lŏdʒəɹ), the ending of a few words which are virtually adaptations of actual or assumable Gr. words in *-λόγος* (L. *-logus*): see -LOGUE, -LOGY. The proper scope of this department of study has been and is much controverted, and books on 'logic' differ widely in the range of subjects which they include The definition formerly most commonly accepted is 'the art of reasoning', for various modern definitions see the later quots At all times the vulgar notion of 'logic' has been largely that it is a system of rules for convincing or confounding an opponent by argument

In the Middle Ages logic (or DIALECTIC, q v) was one of the three sciences composing the 'trivium', the former of the two divisions of the seven 'liberal arts'

-logic (lǫ dʒik), **-logical** (lǫ dʒikăl), endings originally occurring in adaptations (through F. and L.) of Gr. adjs in -λογικός, derived from adjs and sbs in -λογος, -λογον, which have derivative nouns of quality or function in -λογία, represented in Eng. by -LOGY As the meaning of an adj. in *-logic(al)* may with substantial correctness be rendered by 'pertaining to —logy', such adjs. are commonly apprehended as derivatives of the related sbs. (as if *—logy* + -IC) In general, the existence of a sb. in *-logy* now implies the potential existence of a correlative adj in *-logical* (the exceptions being confined to a few of the older words, such as *apology*, which have corresponding adjs of different formation) For the difference in meaning between adjs. in *-logic* and the (now much more frequent) adjs in *-logical*, see -ICAL, and cf the note under GEOLOGIC 1

-logy (lŏdʒi), earlier written *-logie*, an ending occurring originally in words adapted from Gr. words in *-λογία* (the earliest examples, e.g. *theology*, having come through F *-logie*, med L *-logia*). These Gr. words for the most part are parasynthetic derivatives, in some instances the terminal element is *λόγος* word, discourse (e.g. in *τετραλογία* tetralogy, *τριλογία* trilogy); more commonly it is the root *λογ-* (ablaut-variant of *λεγ-*, *λέγειν* to speak. cf LOGOS) In the latter case, the sbs in *-λογία* usually denote the character, action, or department of knowledge proper to the person who is described by an adj or sb. in *-λόγος*, meaning either '(one) who speaks (in a certain way)', or '(one) who treats of (a certain subject)'. Hence the derivatives in *-λογία* are of two classes, (1) those which have the sense of 'saying or speaking', examples of which are the words anglicized as *battology*, *brachylogy*, *cacology*, *dittology*, *eulogy*, *palilogy*, *tautology*, and (2) names of sciences or departments of study. As the words of the last-mentioned class have always a sb. for their first element, and *o* is the combining vowel of all declensions of Gr. sbs., the ending of these compounds is in actual use always *-ολογία*, becoming *-OLOGY* in Eng. The names of sciences with this ending are very numerous. some represent words already formed in Gr, as *theology*, *astrology*, many represent formations which might legitimately have existed in Gr, as *geology*, *zoology*, *psychology*, others are of hybrid composition, as *sociology*, *terminology*, *insectology* The modern formations in *-logy* follow the analogy of Gr formations in having *o* as the combining vowel; exceptions are *petralogy* (an incorrect form which some writers prefer to *petrology* because it shows the derivation from *πέτρα* rock, not from *πέτρος* stone) and *mineralogy* (F *minéralogie*) which may be viewed as a contraction for **mineralology* The suffix *-ology* is freely used in the formation of humorous nonce-wds, some of which are illustrated below All the modern formations in *-logy* may be said to imply correlative formations in -LOGICAL and -LOGIST; in the case of some of the older words, the related personal designation ends in -LOGER or -LOGIAN. (Cf. -LOGUE.) Hence

Logy *nonce-wd* =OLOGY.

For examples of the OFr. and med L terms see J M Manly in *Harvard Studies Philol & Lit* I. (1892) 88 ff The main difficulty is that these terms appear, whenever their sense can be determined, to mean the octave of Pentecost, or Trinity Sunday. Prof Manly, however, points out that there is evidence that 'Pentecost' was sometimes used for the season beginning at Easter and *closed* by Whitsunday, so that the transference of the name 'close of Pentecost' from Trinity Sunday to Whitsunday, though lacking direct evidence, is not improbable The use may have been merely local English; the *Ayenbite* and Shoreham both belong to Kent]

13 a. *Phonetics* and *Prosody*. Applied to a vowel (in mod. use also to a consonant) when its utterance has the greater of the two measures of duration that are recognized in the ordinary classification of speech-sounds. Also, in *Prosody*, of a syllable Belonging to that one of the two classes which is supposed to be distinguished from the other by occupying a longer time in utterance. (Opposed to *short*.) *Long mark*: the mark (–) placed over a vowel letter to indicate long quantity

In Greek and Latin metre, a syllable is reckoned long (1) when it contains a long vowel or a diphthong, and (2) when its vowel is followed by more than one consonant (to the latter rule there are certain exceptions) A short syllable is conventionally supposed to occupy one time-unit (*mora*) in utterance, and a long syllable two. The distinction between the two classes of syllables, with criteria nearly identical with those of Gr and Latin, is recognized in the prosody of many other peoples; in Skr the equivalents of 'long' and 'short' are used of vowels only, syllables being classed as 'heavy' and 'light'

Various inaccurate uses of the terms *long* and *short* were formerly almost universal in Eng, and are still common (1) The vowel of a 'long' syllable, if 'naturally' short, was said to be '*long by position*' (2) By a confusion between the principles of quantitative and those of accentual verse, the stressed syllables, on the periodical recurrence of which the rhythm of English verse depends, were said to be 'long', and the unstressed syllables 'short' (3) In ordinary language 'the long *a*, *e*, *i*, *o*, or *u*' denotes that sound of the letter which is used as its alphabetical name, while 'the short *a*, *e*, *i*, *o*, or *u*' denotes the sound which the letter most commonly has in a stressed short syllable (in the notation used in this Dictionary, respectively æ, e, ɪ, ɒ, ʊ)

2. The suppression of the qualified adj, adv., or phrase, in expressions like *to be long about one's work*, causes the adv. *long* to assume the character of a quasi-adjectival predicate = 'occupying a long time', 'delaying long'. Const. *in*, † *of*, † *a* (with gerund; the prep. is now often omitted *colloq*), also followed by conj. *ere*, *or*, *before*.

The originally advb character of the word in this use is shown by the form *longe* (riming with *fonge*) in the first example, and by the analogy of the similar use of the advb phrase in *to be a long time*. Cf, however F, *être long à*

Long, obs. form of Lung, aphetic f. Along

-long (lǫŋ), †**-longs** *suffix*, forming advs. The earliest instance is *endlong*, from ON. *endlang-r* adj, 'extending from end to end', 'the whole length of'. The word is properly a compound of Long *a*, but in Eng it was principally used as adv, and developed the sense 'end-wise', 'end foremost', so that it became parallel in meaning to words like *sideling, headlong, backling*. The ending *-long* thus came to be regarded as a variant of *-ling suffix*[2]. Hence, on the one hand, the occasional 14th c. form *endelyng* for *endlong*, and, on the other hand, the substitution of *headlong(s, sidelong(s, flatlong(s* for the earlier *headling(s, sideling(s, flatling(s.*

13. As a prefixed title, forming part of a person's customary appellation. Abbreviated Ld, formerly † L (*pl* LL), Lo

The rules now accepted for its use are as follows In other than strictly ceremonial use it may be substituted for 'Marquis', 'Earl', or 'Viscount' (whether denoting the rank of a peer, or applied 'by courtesy' to the eldest son of a peer of higher rank), the word *of*, when it occurs in the more formal designation, being dropped Thus 'Lord Hartington', 'Lord Derby', 'Lord Manvers', 'Lord Palmerston', may be used instead of 'The Marquis of Hartington', 'The Earl of Derby', 'Earl Manvers', 'Viscount Palmerston'. A baron (whether a peer, or a peer's eldest son known by the title of his father's barony) is always called by his title of peerage (either a surname or a territorial designation) preceded by 'Lord', as 'Lord Tennyson', if the Christian name is mentioned for distinction, it comes first, as 'Alfred, Lord Tennyson' The territorial titles given by courtesy to judges in Scotland are treated like those of barons, as 'Lord Monboddo' The younger sons of dukes and marquises have the courtesy title of 'Lord' followed by the Christian name and surname, as 'Lord John Russell' These rules were, for the most part, already formulated in the 16th c, but were for a long time seldom accurately observed except by experts in heraldry

In early use the prefixed title had most commonly the form *my Lord* (see 15) or *the Lord*. The latter survives in certain formal uses, and in the superscription of letters.

The transitive use, which occurs twice in ONorthumbrian and appears in general use early in 13th c, seems to have arisen partly from interchange of function between the indirect obj and the subj. where these were not distinguishable by case-form (cf. LIKE *v.*, LOATHE *v.*), and partly from the perfect conjugated with *be* (OE *hit is gelosod* = it is lost), which admits of being apprehended as passive. The later sense-development of the vb. has been influenced by the cognate LEESE *v.*, with which it became synonymous, and which it in the end superseded.

The regular mod. Eng. pronunciation repr. OE. *losian* would be (lōuz); the standard Eng pronunciation (lūz) seems to be due to association with LOOSE *v.*, which in some contexts (e.g *to loose hold*) closely approaches this vb in meaning. Many dialects have the phonetic form normally descending from the OE. vb The Sc. form *loss* is prob evolved from the pa t. and pa. pple *lost*]

The Teut word was adopted into the Rom langs.: F. *lot* (whence *lotir* to divide, in OF. to cast lots), It *lotto* game of chance, Sp, Pg. *lote* lot, Sp. *loto* 'lot' put up to auction. Probably some of the uses of the Eng. word are due to the influence of F *lot.*

The primary meaning of the Teut. root **hleut-* is uncertain Schrader has suggested that it may have been formed by secondary ablaut from the wk-grade **hlut-* (repr pre-Teut *klud-* : see Holt) in the sb. **hluto-m*, the primary sense of which would then be the piece of wood used in casting lots But this conjecture is very doubtful, and not free from difficulties.]

1 An object (app. usually a piece of wood) used in a widely diffused ancient method of deciding disputes, dividing plunder or property, selecting persons for an office or duty, etc., by an appeal to chance or the divine agency supposed to be concerned in the results of chance. The 'lots', each bearing the special mark of one of the competitors, were placed in a receptacle (in Homeric Greece a helmet); according to Greek procedure the vessel was shaken, the winning lot being that which fell out first, in Scandinavia (see Vigf. s v. *hlutr*) the winning lot was drawn out by an uninterested party. In Eng (exc in rare modern instances, chiefly translations from ancient langs.) the word in this sense occurs only in the phr *to cast, draw* (†also *lay, put, send, throw, warp*) *lots* (or † *lot*); followed by *on* or *upon, over, between, for* (the object or objects concerned); also by inf or indirect interrog. clause

In genuine OE. idiom the vb governing *hlot* was *weorþan* to throw (see Warp *v*), cf. G *das loos werfen*, L. *sortes conicere*, Gr κλήρον βαλλειν In ME *werpe* was superseded by the synonymous *cast* and *throw* The OE. use of *sendan* is a Latinism, after *mittere* of the Vulgate The only forms of the phrase that survive are *to cast lots* (*arch*) and *to draw lots* (cf. F. *tirer au sort*), which is interpreted as synonymous with *to draw cuts* (Cut *sb*[1] 1).
